

Robot Name: TURBO Ceros-T

Category: Robo Wars

Weight Classification: 5.kg Max Limit

Footprint Matrix: 420mm (Width) x 420mm (Length) x 55mm (Sleek Casing Height)

Robo Rumble: Team Meet Up + Facilitator Q&A (FQ&A) Attendance Logbook

The team met every second Saturday and attended some Tues evening Q&A sessions but unfortunately didn't take screenshots but actively engaged and asked questions when we had under Discord User - **tuka0838 + george058255**

Attendance Log

Session Date	Time (Start-End)	Facilitator Name/Username	Our Key Takeaway / Question Asked
2026-06-27	10:00 - 11:30	TEAM - ITU	Clarified core robot chassis design rules, weight restrictions, and baseline kit distribution parameters.
2026-07-11	10:00 - 11:30	TEAM - ALL Online	Addressed autonomous path-finding logic for grand prix, wiring layout rules, and sensor array positioning constraints.
2026-07-25	10:00 - 11:30	ALL]	Evaluated drive-train motor choices and specific strategies for maximizing motor acceleration.
2026-08-08	10:00 - 11:30	ALL	Discussed upcoming regional August bootcamps and strict hardware safety prototype standards.
2026-08-19	09:00 - 11:00	UJ Bootcamp Facilitator - Donnel [attended by George]	Refined category mechanisms, tested hardware configurations, and troubleshooted prototype bugs.
2026-08-22	10:00 - 11:30	TEAM Annah-Sihle-Euli]	Asked about emergency stop switch fail-safes and remote arena disarm signal compliance.
2026-08-29	18:00 - 19:30	thegameroomsa	Watched the Robo-Rumble community stream showcase, reviewed robot design highlights, and engaged in Twitch chat Q&A.
2026-09-04	11:00 - 14:00	Midrand Academy Facilitators	Completed final mock arena runs, calibrated sensor feedback, and polished presentation details.
2026-09-05	10:00 - 11:30	TEAM - ALL	Discussed final arena layout specifications, floor surface materials, and event testing procedures.
